Once you log in you will be at the course dashboard. Click on the Course Name to go to the course, or click resume to go to the next step once you've started, or click expand the all (or the tiny down arrow) to find a particular class topic. From this 'progress' summary the tests are accessed in the Class for that topic, you can't go to them directly from here. Tests you have taken are visible under that Class, click "Statistics" if you want to review your results.

1001A Test v2.20
November 19, 2019 9:02 am

0% Failed

[Statistics](#)

This is the main Course page. Check the introduction unit first and review flipbook with more details on course completion requirements and where to find things in the LMS. Once you click a unit to get into the course, the view shifts, with an overview on the left side and the unit you are in on the right.

The tests have a 90-minute time limit and three attempts allowed.

Click on the "Materials" tab to find the links to the Handbook and Recorded lectures.

There are several links to the test page, and there is a button there to start the test.

Level One with 1008

44% COMPLETE Last activity on May 21, 2020 4:07 pm IN PROGRESS

This LMS (learning management system) is intended to support students enrolled in the live Level One Building Operator Certification training program at locations around the country.

For each Section, the main 'class' includes a description and resources as well as a Materials tab with an outline and links to the class handbook and recorded lecture if you need to make up a class. This is followed by a class evaluation and class assignment (when applicable).

The Introduction Class includes links to important program resources and introductory surveys.
