

SPARK TOOL—ASSESS YOUR BUILDING'S POTENTIAL

JOIN BETTERBRICKS AND THE GREEN BUILDING INTEREST GROUP FOR AN EXCLUSIVE WEBINAR

ABOUT

Join us to learn about the building renewal strategy and how to use the Spark Tool to assess if your building is ready for a deep energy retrofit.

The webinar will focus on how to leverage Spark's integrated technical and financial reports to communicate the business case for building renewal projects. The webinar will include an overview of the building renewal strategy, a live demonstration of the Spark Tool, and a look at the customized integrated measure packages the Tool can create.

SPARK

Spark, a free, interactive online tool, can help you determine if your commercial building is a good candidate for a deep energy retrofit. This early assessment tool produces a report with estimated energy savings and real estate returns, and suggested measures and next steps. Watch this short video to learn how [Spark can reposition a building](#).

BUILDING RENEWAL

Building renewal is a real estate strategy to modernize a building and improve its competitive position by focusing on comprehensive energy efficiency upgrades resulting in 35% or more of a building's energy use and costs.

EARN BUILDING OPERATOR CERTIFICATION POINTS

This Spark webinar provides 1 maintenance point towards renewal of the BOC® credential.
